LAD CONTRACTS PTE LTD

COMPANY'S PROFILE

LAD CONTRACTS specialises in supply of high-quality industrial steel pipes and fittings, as well as corrosion protection services for the Oil and Gas, Petrochemicals, Marine and Water industrial sectors.

At LAD CONTRACTS, we have established our business principals based on providing unparalleled service support and integrity in surpassing our clients' expectations.

OUR FOCUS IN THE INDUSTRY

- COMPLETE TURNKEY PROCESS FLOW
- SPECIALISED PIPES FOR OIL AND GAS TRANSMISSION
- HARDWARE & FITTINGS FOR ENERGY APPLICATIONS
- SPECIALISED CORROSION PROTECTION SERVICES FOR PIPES/FITTINGS ETC.

FBE Coated Valves

Bare Pipes

3LPE Coated Barred Tees

Induction Bending

PRODUCTS

RANGE OF HARDWARE

Our range of hardware encompass the following:

- Hardware like Steel Tubes, Pipes, Cylinders, Fittings, Valves & Flanges for Oil & Gas, Marine & Energy Industrial Applications. These hardware are of a broad selections of grades, shapes and sizes from Standards such as ASTM, ASME, API, DIN etc. Pipe types include Seamless, ERW and SAW Pipes commonly used for Oil & Gas Transmission.

STEEL PIPES AND TUBES

- Pipe Material :
 - Carbon Steel
 - Duplex Stainless Steel
 - Stainless Steel
 - Alloy Steel
- Pipe Grades :
 - API 5L X42/X52/X60/65
 - TP304/316
 - A106/333 etc
- Diameter Size : 2" to 64"
- Wall Thickness : Sch 40 to 160
- Pipe Lengths : 6 to 12m

BENDS AND FITTINGS

These bends can be fabricated from various pipe materials like carbon steel, alloy steel and stainless steel and can be customized at any angle, radius or size to meet the client's requirements, ensuring consistency and predictability of ovality and thinning and a high-quality surface finish. Multiple bends in one pipe can reduce welding required compared to fittings.

For connection of pipelines, elbows, tees, reducers, caps are some of the fittings available, both butt-welded and forged. Applications include oil and gas, petrochemical and marine industries where vibration, high pressure and extremely corrosive conditions exist.

LAD CONTRACTS PTE LTD

CORROSION PROTECTION SERVICES

CORROSION PROTECTION SERVICES

LAD CONTRACTS provides specialised coating services for both pipes and fittings :

- FUSION BONDED EPOXY (FBE)
- 3-LAYER POLYETHYLENE (3LPE)
- MULTI-LAYER POLYPROPYLENE (MLPP)
- CONCRETE WEIGHT (CWC)
- NEOPRENE LINING
- GLASS FLAKE
- POLYUREA
- INTERNAL FLOWCOAT
- CORROSION REMOVAL AND CONTROL ON-SITE

3LPE Coated Bends

3LPE Coated Pipes

FBE & Neoprene Coated Pipes

3LPE Coated Concentric Reducer

3LPE Coated Barred Tees

Concrete Weight Coated Pipes

FBE Coating of Flanges

LAD CONTRACTS PTE LTD

CORROSION REMOVAL AND CONTROL ON-SITE

CORROSION REMOVAL AND CONTROL ON-SITE

LAD CONTRACTS offers comprehensive coating services required by the industry:

IN-SITU COATING

We are able to offer coating services at the site of our customers for pipes, fittings and flanges. This service is typically required for large orders or if there is a large retrofitting project.

MAINTENANCE AND COATING

Plants and pipelines must be maintained regularly. **LAD CONTRACTS** services includes on-site blasting and cleaning of pipes, fittings and flanges.

Manual Coating of Flange

Neoprene Jacket Riser

FBE Coating of Bend

OUR TECHNOLOGY

PLANT

We use the latest technology to support the fastest reconfiguration for different diameter pipes.

Our plant design supports 2-inch to 64-inch pipe diameter varying from 6 to 12 m length

Our plant is fully automated and uses the latest motors and nozzles from Europe and USA. Only a total of 15 people is required to support and operate the plant daily.

IN-SITU COATING TECHNOLOGY

We use the latest flow coat technology together with the latest Spinner Coater technology

MAINTENANCE AND COATING TECHNOLOGY

Using patented portable blaster capable of blasting to SAE standards without dust or pollution, our technology can be used in areas where there is combustible risks, or even underwater without risk to divers.

IN-SITU INTERNAL CORROSION TREATMENT

Internal Pipe Blasting & Painting Equipment :

The equipment shows the Spinner Coater which will be engaged using a flexible lance to push the Coater along the entire route of the pipe while spraying a thin film of quick set epoxy (flow coat) onto the inner surface of the pipe.

LAD CONTRACTS PTE LTD

**COMMITMENT
TO QUALITY**

COMMITMENT TO QUALITY

LAD CONTRACTS is an experienced pipe coating company working in partnership with international pipe suppliers and coaters.

OUR SERVICES has been accepted by stringent customers such as Shell Petroleum Group of Companies.

OUR PROFESSIONAL WORK includes an integrated service from procurement of pipes and fittings, coating, testing (destructive and non-destructive) and installation services.

OUR ABILITY to handle large and small jobs differentiate LAD CONTRACTS from other major coaters.

WHY WORK WITH LAD CONTRACTS?

We are able to provide a one-stop service to customers - the acquisition of pipes and fittings, providing high-quality corrosion protection services and conducting tests before delivery of the products to the site.

Our coating plant design is automated to allow the reconfiguration of the plant for different pipe sizes within a few hours.

Our coating equipment include specialised ovens for the coating of fittings and flanges.

More importantly, we have developed comprehensive quality procedures and reporting to provide the highest level of confidence to our customers.

Holiday Test on FBE Coated Pipes

Pigging Test on Bend

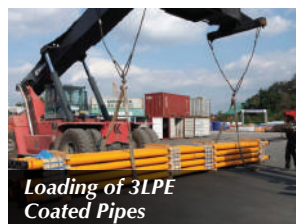

Impact Test on FBE Coated Pipes

Cutback Measurement on 3LPE Coated Pipe

Destructive Metallurgy Test on Induction Bend

Loading of 3LPE Coated Pipes

Coating Thickness Test on 3LPE Coated Bends
